OneShare for Digital:

featuring Xamarin

The Ultimate "Out of the Box" Mobile DevOps Platform

Digital transformation is no longer a future strategy, it is an immediate reality. Customers today expect real-time information and access to your products and services. The marketplace demands a consistent digital experience across multiple platforms and devices in addition to a simple interface and flawless application functionality.

During this digital transformation journey, your organization will feel the need to increase the speed of the application development process in order to remain competitive. However, with increased speed comes increased challenges. Maybe the on-boarding of your application teams takes too long and productivity does not start until the environment is configured. Sometimes the inconsistency of the developer environments slows down the process. Then there is the challenge of making sure you have the right infrastructure skills and resources. Finally there is the time it takes to test the application. All of these factors contribute to the speed and accuracy of delivering a quality application.

Sogeti clearly had these challenges in mind when developing OneShare for Digital. Faster time to market starts now.

OneShare

OneShare, Sogeti's cloud platform solution, has been enhanced for DevOps and combines pre-tested, approved and configured tool sets with platforms, services, and processes providing a repeatable and consistent mobile development platform.

Solution Strength through Partnership

Sogeti OneShare for Digital has partnered with Microsoft and Xamarin to integrate their leading technologies into one robust solution. Using the power of Microsoft Azure, Sogeti is able to provide pay-as-you consume pricing options that also allow for greater development speed and agility. Xamarin studio and Test Cloud provides a mobile cross-platform development capabilities with a single code base. This gives you the ability to test mobile applications on multiple devices with streamlined visibility in a fraction of the time. Sogeti OneShare provides standard templates and configured tool sets that bring the entire process together, giving you the capacity to spin up and replicate test environments in a matter of minutes.

Taking the Next Step in Your Digital Transformation Journey

**Getting started with OneShare for Digital in a simple process.**

1. Contact Sogeti to arrange for a OneShare for Digital Demonstration

2. Schedule an initial 1 day workshop with the Sogeti OneShare team to discuss environment requirements

3. Sogeti will provide a personalized quote within 2 days of the workshop

4. Initial implementation and on-boarding can take place within one week

5. Application management and maintenance services are also available post implementation.

The Value and Benefits of OneShare for Digital

Sogeti created OneShare for Digital with organizations like yours in mind. No two cloud journeys are ever alike, but our experience has allowed us to develop strong cloud competencies, tools, accelerators and a high level of expertise that has proven to be repeatedly successful. We can provide specific value through the following:

Full Lifecycle up to DevOps
- A one stop shop for Mobile Application Development and Testing
- strategy, consulting, design, migration, testing & run
- Combining application and infra assets

Optimize Infrastructure Consumption and Costs
- Pay per use model
- Visibility into specific project costs
- Catalog of services and options

Increase Application Time to Market
- Replicate development and testing environments with OneShare in minutes
- Pre-built templates and tools to optimize you staff and time
- Reduced on-boarding and hiring staff with specific infrastructure skills

High Reliability & Quality
- Leading in Quality Assurance - Testing & monitoring the integration, performance and security

Leading Technology Partnerships
- Our partnership with Microsoft grants us direct access to the Xamarin and Microsoft product and development teams, exclusive resources, funding and sales assistance.
